

Material Plastic

Two different variants of “adjustable pointer” are available:

Variant 1:

The red pointer is printed on the inner side of the front glass.

The front glass is provided with a knurl, such that the entire front glass must be turned to adjust the red pointer.

➔ Design: “Pointer printed on the front glass, adjustable viewing pane”.

Variant 2:

The red pointer can be adjusted on the front glass using an appropriate screwdriver.

Only the pointer is moved for the adjustment, the front glass remains fixed on the casing.

➔ Design: “Pointer adjustable with screwdriver”.

Front glass, plastic
